

Dear Clients!

Nothing says spring more than enjoying a few hours of fishing. Envirotech Environmental Consulting, Inc. (EECI) offers fish stocking services for everything from small private ponds to the largest stormwater retention ponds. Stocking game fish can create an amenity that provides endless hours of enjoyment. EECI can stock a variety of fish from Large Mouth Bass to several species of Sunfish, customized for each client's pond and needs. EECI utilizes only locally raised regulatory approved native and naturalized game fish species.

As always, EECI encourages catch and release fishing practices. Please contact EECI for more information on fish stocking at info@envirotechcinc.com. Till then, keep fishing!
