Weeding for Turf Management

Weed control and fertilizers for turf management should not be used within 15 feet of storm water pond buffers, drain inlets, and storm water conveyances should not occur as it will have adverse effect and damages the water quality. It can also kill wildflowers and beneficial native plants.

If you have any questions or concerns, please contact EECI's professional office at 302.684.5201 or via email at info@envirotechecinc.com!
